About BHP

At BHP Technology we support our people to grow, learn, develop their skills and reach their potential.

With a global portfolio of operations, we offer a diverse and inclusive environment with extraordinary career opportunities. Our strategy is to focus on creating a safe work environment where our employees feel strongly connected to our values and objectives, and where the capability of our people is key to our success.

To enable the rapid deployment of digital solutions we have established Digital Teams across Australia. Think of us as a “startup within a company” made up of multi-disciplinary, non-hierarchical teams with one focus: delivering digital solutions that improve the lives and

work of our mining teams.

We work fast and solve tough problems, and pride ourselves on our culture of open collaboration, safety, diversity of thought and fun. We're looking for the best and brightest developers, engineers, data scientists and designers to join us, working from our offices in Perth and Brisbane.

Come and be a part of this success.

About the Role

As a Full Stack Developer, you will play a key role supporting the Digital team and the Digital Factory projects that fundamentally change BHP's performance across safety, productivity and people performance. The Digital Factory is BHP's approach to rapid design and development of digital that provide solutions to operational challenges. The Full Stack Developer's primary responsibility is to contribute across the technology stack, covering the end-to-end development of web and native applications, as well as improvements to DevOps tooling. Key accountabilities include:

- Shaping and implementing technology / business solutions to contribute to the DF Product Development and solve Asset opportunities
- Full life cycle management of software from requirements, planning, design, implementation, delivery and maintenance
- Using Agile engineering practices and various software development technologies to rapidly develop creative and efficient solutions that enhance the Asset's technology stack
- Collaborating with other team members to implement user stories, write tests, and continuously deliver new / improved product functionality
- Communicating with internal BHP Technology teams to resolve technical dependencies during implementation

About You

We are looking for a seasoned developer with a passion for creating reliable digital solutions; someone who can understand the 'why' of a product, to solve the how, and deliver products our customers love to use. You will enjoy solving complex problems and collaborating in a team environment made of diverse skills and experiences. You will be happy working in a fast paced start-up like culture but with the resources of multinational organization can provide.

- Experience in the development and productionisation of software
- Experience in writing REST-like services on either the JVM or .NET platform
- Experience with cloud technologies, preferably AWS
- Agile experience, including test-driven development

- Adaptable to different technologies
- Experience working with version control and peer review processes
- SQL (preferably PostgreSQL)
- Experience in supporting production systems
- You know how to learn any language, how to choose the right one for the problem you need to solve and can create new designs.
- Can code in the following language: Python, JavaScript/React, Java/Spring Boot, C#, Kotlin
- Terraform experience
- Event driven and/or micro-service solution architecting
- Experience with monitoring and alerting
- Experience in CI/CD pipeline
- sage and simple builds of Docker

Supporting a Diverse Workforce

The size and magnitude of our business not only provides significant opportunity for professional development, but also attractive salary packages with performance based bonuses and unique BHP employee share program.

At BHP, we recognise that we are strengthened by diversity. We are committed to providing a work environment in which everyone is included, treated fairly and with respect. We are an Equal Opportunity employer and we encourage applications from women and Indigenous people. We know there are many aspects of our employees' lives that are important, and work is only one of these, so we offer benefits to enable your work to fit with your life. These benefits include flexible working options, a generous paid parental leave policy, other extended leave entitlements and parent rooms.

All qualified applicants will receive consideration for employment without regard to race, color, sex, national origin, age, religion, disability, sexual orientation, gender identity, protected veteran status, citizenship, genetic information or other protected status under federal, state or local laws.

BHP is an Equal Opportunity Employer - Minorities/Females/Veterans/Disability.

You must have the **right to live and work** in this location to apply for this job.
